

Complexity of recognizing Dyck languages of bounded height with quantum query algorithms.

Maxime CAUTRÈS

Faculty of Computing
University of Latvia

31/08/2022

Sommaire

- 1 Introduction.
 - Quantum query model and complexity.
 - Dyck languages of bounded height
 - History of the problem
- 2 State of the art
- 3 The progress to reduce the $\text{DYCK}_{k,n}$ QQC .
- 4 New idea to get better quantum query complexity bounds

Classical and quantum computers are both made with simple components.

a .

b .

c .

$|a\rangle$

$|b\rangle$

$|c\rangle$

Figure: A Boolean circuit (Full adder).

Figure: A Quantum circuit.

Classical and quantum computers are both made with simple components.

Figure: A Boolean circuit (Full adder).

Figure: A Quantum circuit.

Classical and quantum computers are both made with simple components.

Figure: A Boolean circuit (Full adder).

Figure: A Quantum circuit.

Classical and quantum computers are both made with simple components.

Figure: A Boolean circuit (Full adder).

Figure: A Quantum circuit.

Interacting with qubits is more more complexe.

Figure: A classical bit

Interacting with qubits is more more complexe.

Figure: A quantum bit.

Interacting with qubits is more more complexe.

Figure: A classical bit

Figure: A quantum bit.

A	B	$A \oplus B$
0	0	0
0	1	1
1	0	1
1	1	0

Figure: Truth table on 2 bits.

Interacting with qubits is more more complexe.

Figure: A classical bit

A	B	$A \oplus B$
0	0	0
0	1	1
1	0	1
1	1	0

Figure: Truth table on 2 bits.

Figure: A quantum bit.

$$H^{\oplus 2} = \frac{1}{2} \begin{bmatrix} 1 & 1 & 1 & 1 \\ 1 & -1 & 1 & -1 \\ 1 & 1 & -1 & -1 \\ 1 & -1 & -1 & 1 \end{bmatrix}$$

Figure: Unitary matrix on 2 qubits.

Quantum query algorithm is just a quantum circuit.

Figure: Structure of a quantum query algorithm.

Dyck words

Dyck word of bounded hight

The trichotomy article

There is two main direction of study

Goal of the internship

Sommaire

- 1 Introduction.
- 2 State of the art
 - Lower bounds to the QQC of $\text{DYCK}_{k,n}$
 - Upper bounds to the QQC of $\text{DYCK}_{k,n}$
- 3 The progress to reduce the $\text{DYCK}_{k,n}$ QQC .
- 4 New idea to get better quantum query complexity bounds

Dont speak to muck about it

- By reduction:
- By adversary method:

MOre information in the report

Algorithms gives QQC upper bounds.

Reduction to transmit the QQC upper bounds .

Sommaire

- 1 Introduction.
- 2 State of the art
- 3 The progress to reduce the $\text{DYCK}_{k,n}$ QQC .
 - Why does the problem is not only a grover search
 - Original algorithm and small revisions
 - A new algorithm for $k=2$
- 4 New idea to get better quantum query complexity bounds

For $k \geq 2$ it is not more easy

Introduction.

State of the art

The progress to reduce the $\text{DYCK}_{k,n}$ QQC .

New idea to get better quantum query complexity bounds

Why does the problem is not only a grover search

Original algorithm and small revisions

A new algorithm for $k=2$

presentation of the algorithm

small revision

Introduction.

State of the art

The progress to reduce the $\text{DYCK}_{k,n}$ QQC.

New idea to get better quantum query complexity bounds

Why does the problem is not only a grover search

Original algorithm and small revisions

A new algorithm for $k=2$

the new algorithm

can be plug in the big one

Sommaire

- 1 Introduction.
- 2 State of the art
- 3 The progress to reduce the $\text{DYCK}_{k,n}$ QQC .
- 4 New idea to get better quantum query complexity bounds
 - lower bounds: try to do reduction from other problem
 - Upper bounds: Trying not do to every node
 - Conclusion

Introduction.

State of the art

The progress to reduce the $\text{DYCK}_{k,n}$ QQC .

New idea to get better quantum query complexity bounds

lower bounds: try to do reduction from other problem

Upper bounds: Trying not to do every node

Conclusion

Introduction.

State of the art

The progress to reduce the $\text{DYCK}_{k,n}$ QQC .

New idea to get better quantum query complexity bounds

lower bounds: try to do reduction from other problem

Upper bounds: Trying not to do every node

Conclusion

Conclusion

What as been done:

-

Possible idea to go further:

-
